DESIGNATION

Consultant

MORE ABOUT DANIEL

AREA OF INTEREST (RELATED TO EDUCATION)

As a budding clinical educator and teacher, Dr Quek remains broadly interested in the diverse field of medical education. His current interests include:

- Curriculum design
- Assessment
- Excellence in clinical teaching

EDUCATION PROJECT OR EDUCATION RESEARCH PROJECT

Physiotherapy Advanced Scope Practice in Emergency Department – TTSH Physiotherapy aspires to further the capabilities and responsibilities of our physiotherapists to enable them to practice at the top of their license and improve patients' access to physiotherapy services. Central to achieving this goal is a training programme led by Dr Quek from the TTSH Emergency Department, supported by Diagnostic Radiology and Orthopaedic Surgery that aims to upskill ED Physiotherapists (PT) to attend to patients with selected musculoskeletal (MSK) conditions as first-touch practitioners. The rigorous programme comprises self-directed learning using prepared online resources, Objective Structured Clinical Examinations (OSCE), case-based discussions, clinical observership, supervised clinical practice, formative and summative assessments.
