

Portfolio Assessment Workshop for Pharmacists

Description

The MOH Competency Standards for Pharmacists in Advanced Practice had been developed to provide clarity on a pharmacist's scope of practice and define the knowledge, skills and attributes that are needed in order to effectively perform a range of professional practice activities at a desired level. This Advanced Practice Framework (APF) is portfolio-based, and serves to (1) assist institutions with workforce and succession planning; (2) facilitate effective use of resources for training and development; (3) encourage individuals to take more responsibility for their own development.

Conducted by Tan Tock Seng Hospital in collaboration with MOH and NHG College, this Portfolio Assessment Workshop aims to equip Pharmacists with the skills and knowledge to establish for their institutions the requisite portfolio assessment system based on the APF, and be able to conduct portfolio assessments.

Duration

1 day

Programme Content

This Programme comprises of the following learning topics:

1. Application of APF to Healthcare Institutions and Pharmacists
2. Development of Blueprint and Learner Dashboard Based on APF Competency Standards
