

CLINICAL PRACTICE IMPROVEMENT PROGRAMME (CPIP)

Building Teams with a Quality Improvement Mindset

ABOUT THE WORKSHOP

The Clinical Practice Improvement Programme (CPIP), launched in 2002, is designed to help develop clinical leadership in the delivery of evidence-based quality care. It provides a platform for multi-disciplinary healthcare teams to learn ways to lead improvement where gaps are evident in the delivery of care.

The programme provides scientific training in the following areas: understanding patients' needs and diagnosing practice gaps; measuring and understanding variance in practice and processes; developing interventions using plan-do-study-act (PDSA) cycles; collaborating with multi-disciplinary care providers; and designing strategies to sustain change.

Following the workshop, participants will have to undertake a six-month improvement project with guidance from CPIP facilitators. This experiential learning model will help participants to transit from “knowing” to “doing” as they apply the quality improvement principles and tools in their project to improve patient care.

LEARNING OBJECTIVES

At the end of the programme, participants will learn about, understand and apply:

- The science and essential elements of quality improvement
- Effective teamwork
- Project management
- Evidence-based medicine and variation in quality improvement work
- Measurement for improvement
- Cost and quality

Course Duration

Six months. Participants are required to attend ALL 3 sessions (the main workshop, midpoint and final review) and complete an improvement project.

Session 1: The Main Workshop - 3.5 days

Session 2: Midpoint Review - 1 day

(To review teams' progress | 3 months after the main workshop)

Session 3: Final Review - 1 day

(To review project outcomes | 6 months after the main workshop)

Target Audience

- Clinicians (Medical/Nursing)
- Allied healthcare managers
- Administrators who have the authority and responsibility to change and improve practice

Pre-requisites
