## COMMON OUTPATIENT CONDITIONS: USING PRESBYCUSIS AS PROOF OF CONCEPT

Dr Lim Ming Yann Department of Otorhinolaryngology

Otorhinolaryngology

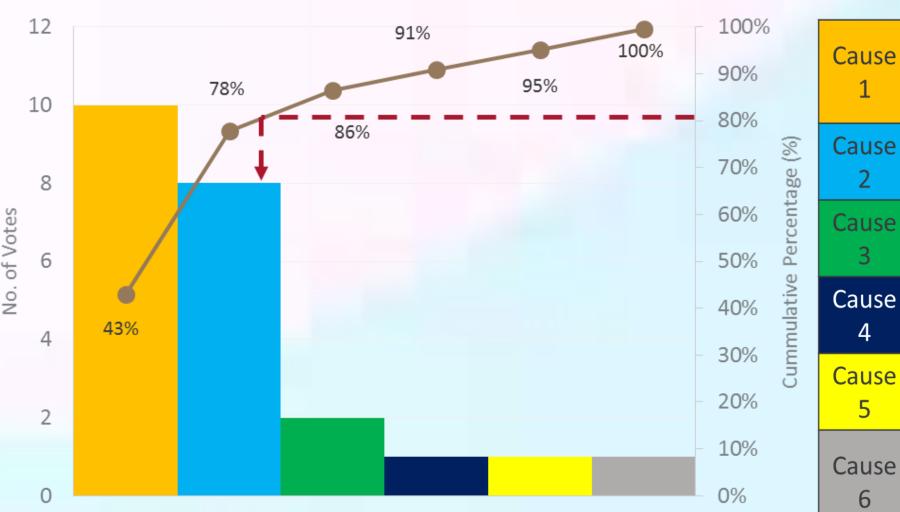

Adding years of healthy life

### **Mission Statement**

Reducing \*unnecessary follow up by ENT doctors in outpatient clinic for first visit presbycusis patients from baseline of 20% to less than 5% in 6 months

\* Unnecessary: Patients with no symptoms of vertigo/ severe tinnitus or other ENT diagnosis that require follow up, or patients with a bilateral bone conduction threshold of > 90dB that may be candidates for a cochlear implant

Consultant

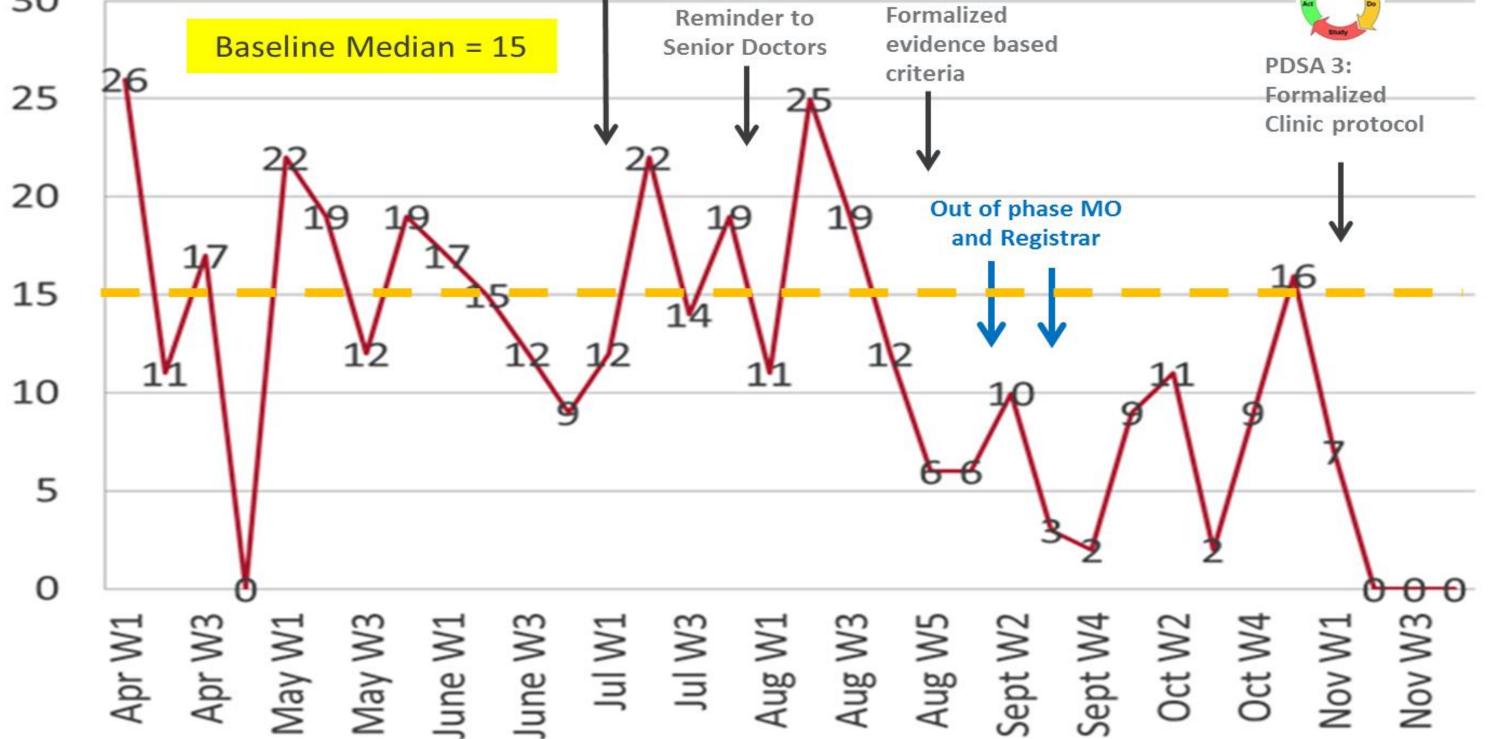

### **Evidence for a Problem Worth Solving**

## Between 1 May 2018 to 30 June 2018, **168 patients** were seen with a diagnosis of presbycusis with these follow up plans:

| Implementation   |  |                           |  |  |
|--|--|---------------------------|--|--|
| CAUSE / PROBLEM<br>(refer to Pareto Chart)   | INTERVENTION   | DATE OF<br>IMPLEMENTATION |  |  |
| Cause A: Junior MOs fear of early discharge of patients  | PDSA 1a: Education of Junior MOs   | 3 July 2018               |  |  |
| Cause E: Senior doctors habitual<br>custom to follow up presbycusis<br>patients in 1 year                  | PDSA 1b: Reminder to Senior<br>Doctors   | 3 August 2018             |  |  |
| (After Audit) Poor understanding as to<br>what constitutes significant<br>asymmetry in hearing             | PDSA 2: Education of doctors<br>regarding what constitutes<br>significant asymmetry in hearing | 4 Sep 2018                |  |  |
| Formal clinic protocol visible in clinic<br>to remind doctors and to account for<br>in between posting MOs | PDSA 3: Formal clinic protocol   | 2 Nov 2018                |  |  |

| % of Inappropriate | PDSA 1A:   |          | Art Do  |        |
|--------------------|------------|----------|---------|--------|
| Follow Ups<br>30   | Junior MOs | PDSA 1B: | PDSA 2: | Act Do |

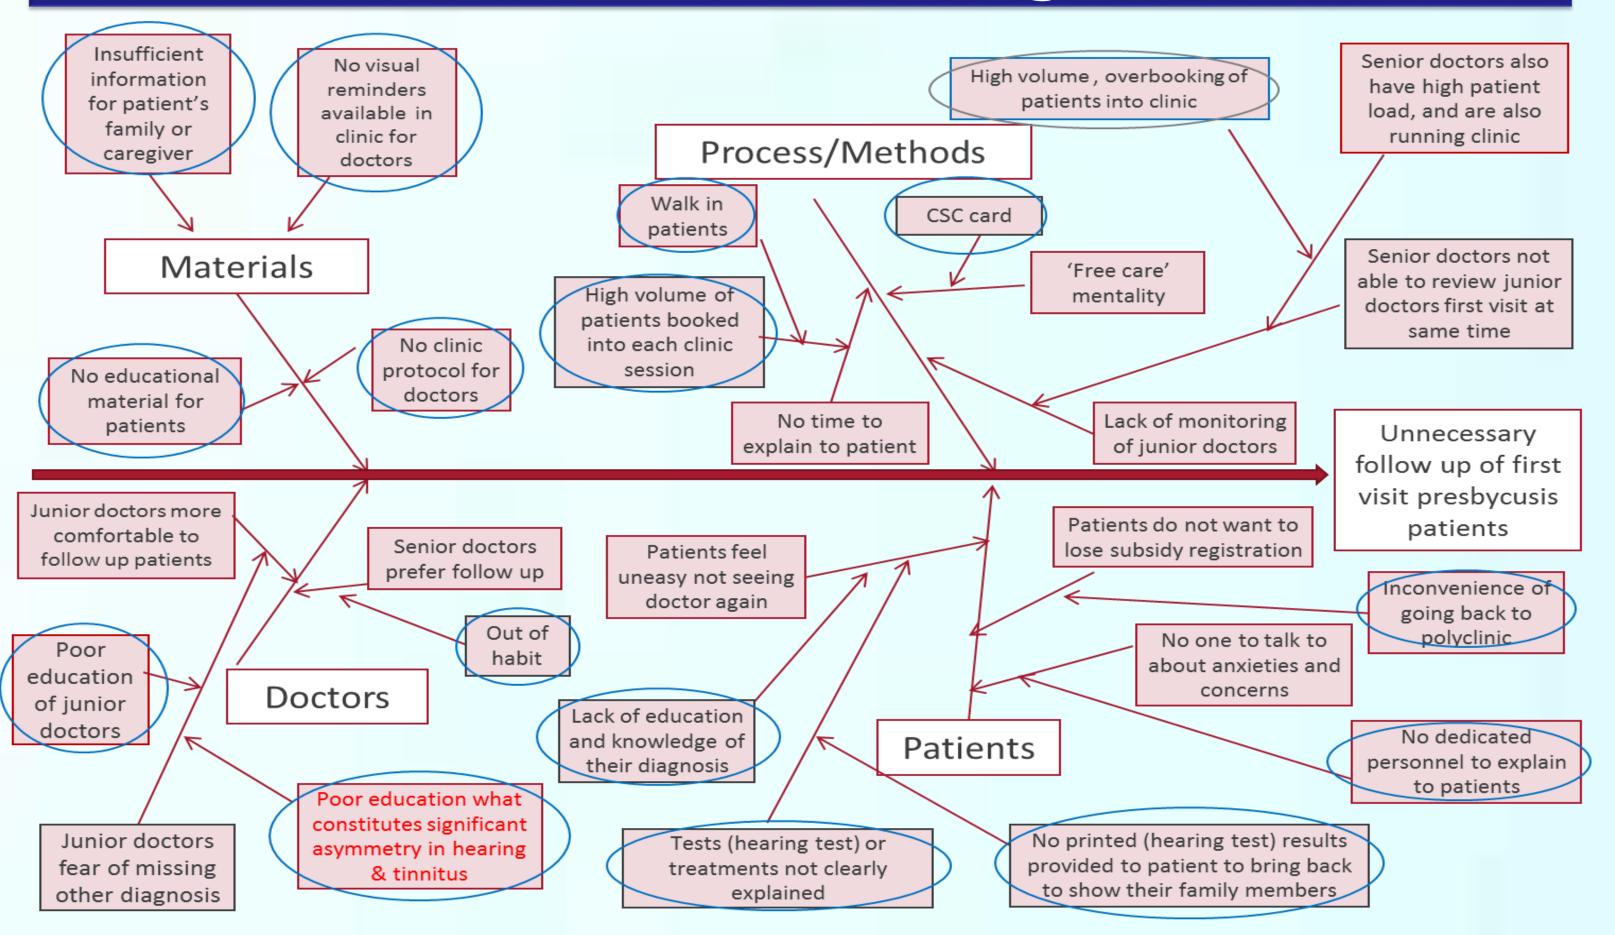

### **Cost Avoidance**

| Private Rate   | Apr to Jun 2018   | Sep to Nov 2018 |  |  |
|--|---|-----------------|--|--|
| No. of Clinic Follow Up                                    | 37  | 15              |  |  |
| No. of Audio Follow Up                                     | 37  | 15              |  |  |
| No. of MRI Follow Up                                       | 12  | 4               |  |  |
| No. of Clinic Follow Up after MRI                          | 24  | 2               |  |  |
| Cost Avoidance for Unnecessary Follow<br>Ups (in 3 months) | $[(15-37) \times \$88] + [(15-37) \times \$31] + [(4-12) \times \$350] + [(2-24) \times \$156] = -\$7354$ |                 |  |  |
| Cost Avoidance for Unnecessary Follow<br>Ups (per month)   | -\$8,85<br><b>= -\$2</b> ,  |                 |  |  |
| Cost Avoidance for Unnecessary<br>Follow Ups (per year)    | -\$2,950<br><b>= -\$29</b>  |                 |  |  |

#### Payment/medication

doctor with or without audiology FU FU FU

### **Cause and Effect Diagram**

Unit Cost for Clinic Follow Up (Private Rate) = \$88; Unit Cost for Audio Follow Up (Private Rate) = \$31; Unit Cost for MRI Follow Up (Private Rate) = \$350; Unit Cost for Clinic Follow Up after MRI (Private Rate) = \$88

### Lessons Learnt

Team work

Note:

- Multiple factors that can affect results
- Audit of results useful in helping with root causes
- Need for constant education of new doctors (clinic protocol better than individual batch education)

### **Strategies to Sustain**

- Protected teaching at beginning of posting during orientation
- Clinic protocol
